

ADESANYA AYOMITIDE EMMANUEL

Platform Support Engineer | Full-Stack Developer | GIS & Geospatial Graduate

tideadesanya@yahoo.com • +234 708 963 0643 • Lagos, Nigeria • tide25.github.io/Tideportfolio.io

PROFESSIONAL SUMMARY

B.Sc. Surveying and Geoinformatics graduate from the University of Lagos, working as a Platform Support Engineer at Mojec Group and a Junior Software Developer at Waitlist Ltd. Experience in payment integrations, ERP and CRM testing, and full-stack development with Next.js, Node.js and PostgreSQL, alongside a geospatial background in CAD, GIS and hydrographic survey. Seeking to contribute to innovative software, mapping and technology solutions in a forward-thinking organization.

EDUCATION

University of Lagos, Nigeria | B.Sc. Surveying and Geoinformatics 2023

Thesis: Ellipsoidal Referenced Surveying Systems for Hydrographic Operations

Dansol High School 2015

WORK EXPERIENCE

Platform Support Engineer | Mojec Group (IT), Power Service Hub 2026 – Present

- Support Power Service Hub (PSH), a utility payments platform used by Nigerian electricity distribution companies including AEDC, IKEDC and Adani Electric.
- Trace prepaid and postpaid meter transaction faults across payment provider integrations (VTpass, BuyPower), testing APIs in Postman and reading HTTP status codes to isolate and escalate issues.
- Coordinate the Paystack and Interswitch gateway integration, developer handover and bug tracking, and write specifications for new modules.
- Led user acceptance testing of the OPERAPLEX ERP across dozens of staff roles, automated with Playwright, and delivered handoff documents and training materials to the developers.
- Built the MojecPay backend and frontend prototype, a Paystack-based payment platform for distribution company customers (Node.js, Express, Prisma, PostgreSQL, Redis, JWT).
- Resolve client support tickets in Freshdesk and keep records of recurring issues and their fixes.

Junior Software Developer (Full-Stack) | Waitlist Ltd 2026 – Present

Frontend

- Made the tenant portal mobile-responsive (Next.js, TypeScript, Tailwind CSS) and fixed bugs across three repositories, deployed through AWS Amplify CI/CD.
- Built two lead-generation funnels, a property operations quiz and a free toolkit, integrated with Brevo CRM and Facebook Pixel and tested on mobile with Playwright.
- Designed a responsive landing page with form validation and real-time feedback to capture and convert early sign-ups.

Backend | CRM & ERP Module Development

- Designed and managed CRM-style modules for waitlist registration, contact capture and user lifecycle tracking, structured around RESTful API architecture.
- Built ERP-adjacent backend logic for position tracking, queue management and automated user notifications.
- Designed and maintained relational database schemas to store and manage structured user and workflow data at scale.
- Implemented error handling, input validation and logging across modules for reliability and data integrity.

Cross-Functional

- Debugged and resolved frontend and backend issues across the full stack, and tested fixes before production deployment.
- Collaborated on system design decisions so the CRM/ERP modules would scale with user growth.

Graduate Intern, Geomatician | Amni International Petroleum Development Company Ltd 2025 – 2026

- Prepared Oil Mining Lease (OML) location maps and dredging route layouts in AutoCAD for petroleum operations.
- Drafted OML boundaries, well locations and dredging routes to support field development activities.

Graduate Engineer (Corps Member) | NYSC, Amec Consult Ltd 2024 – 2025

- Assisted in site supervision, ensuring work complied with drawings, specifications and safety standards.
- Liaised with engineers, surveyors and contractors during project execution.

Team Member B&M Agency	2024
Contributed to agency tasks involving design, web tools and GIS-based initiatives.	
Personal Assistant JIMAB Geoconsults Ltd	2023 – 2024
- Supported hydrographic, topographic and geophysical survey operations, coordinating data handoffs between field and office teams. - Managed project schedules, resource allocation and logistics tracking for field teams. - Built visual data summaries and dashboards from survey datasets for internal presentations and management reporting.	
Intern, Geomatics Engineer/Surveyor Geo-Smart Spatial Technologies Ltd	2021
- Plotted survey plans and delineated property boundaries using DGPS. - Took part in first-order control establishment and instrument calibration. - Conducted cadastral and topographic surveys and assisted in staking out projects.	
Intern / Survey Assistant Allywhyte Consults Ltd	2018
Collected and processed land survey data, calibrated instruments and took part in boundary delineation and staking.	

SKILLS

Frontend and backend: React, Next.js, TypeScript, Tailwind CSS, Node.js, Express, Prisma, PostgreSQL, MySQL, JavaScript, HTML, CSS

Testing and tools: Playwright, Postman, Freshdesk, PowerShell, Git, VS Code, Netlify, AWS Amplify, Brevo, Paystack

Data and GIS: Python, R, SQL, Power BI, Tableau, ArcGIS, AutoCAD, Google Earth, Excel, PowerPoint

Field equipment: Total Station, Level, GPS (Trimble, Tersus, Unistrong DGPS), Single Beam Echo Sounder

Other: Problem-solving, communication, adaptability, fast learner, time management

REFEREES

Available on request.
